

I just received these from Julia and have not had time to study them.

You can see by Jim and Charlotte statements. I knew after my first talk to everyone connected with the case where the murder laid and if it had not been bungled so badly and I could have gotten any support, and if the public's mind had not become set in one direction I would have taken this case when Beekman requested, in spite of the fact at the time I was a nervous wreck, was not eating or sleeping, as I had a dozen murders under arrest.

I knew I could not get any support as 90% of the people at that time believed Mrs. Hall did it or knew who did it. To turn this around in the right direction would then been impossible. The public did not want anyone punished. They just wanted it solved. Been great story for the Press but right will always prevail.
